MINUTES
STATE RECORDS COMMITTEE
January 18, 2018

Michael J. Tyger, Secretary, called the 434th meeting of the State Records Committee to order at 10:07 a.m. on the above date. He stated that notice of the meeting had been posted in the Secretary of State's Office and published in the State's daily newspapers in conformance with the requirements of the Open Public Meetings Act.

Mr. Tyger stated that there was a quorum present. Ms. DiPippo arrived at 10:15 a.m.

ATTENDANCE:

SRC: State Treasurer, Michael J. Tyger, Designee
Division of Local Government Services, Paul Urbish, Designee
Attorney General, Valentina DiPippo, Designee
State Auditor, William Robinson, Designee
Division of Archives and Records Management, Department of State, Joseph Klett

Staff: Elizabeth Hartmann, Administrative Analyst 3, Records Management Services
Vilirie D. Perry, Records Analyst 1, Records Management Services
James Jenkins, Records Analyst 3, Records Management Services
Marcella Campbell, Technical Assistant 1, Records Management Services
Sharon Allen, Technical Assistant 2, Records Management Services
Ellen Callahan, Supervising Archivist, Division of Archives and Records Management, Department of State
Donald Cornelius, Archivist, Division of Archives and Records Management, Department of State

Other: Eric Carlsen, ShoreScan Solutions
Art Staerk, AccuScan
Lauren Wiley, Mercer County

MINUTES:

APPROVAL OF PREVIOUS SRC MEETING MINUTES:

Upon motion, seconded, the Committee voted to approve the December 21, 2017 Minutes three (3) yes, none (0) no and one (1) abstention (Klett).

I. Administrative Actions:

A. Announcement of Approval of Destruction Authorization:

Secretary Tyger announced the approval of routine Artemis requests for disposal of public records: #541794 – 542277

B. Registered Imaging Systems / Amendments / Annual Reviews:

Report to the State Records Committee: (See Attached)

II. New Business:

A. Records Retention Schedule:

Department of State – Presented by James Jenkins

Archives and Records Management – Archives and Records Preservation
S740801-003 - Approved without changes four (4) yes and none (0) no and one (1) abstention (Klett). Mr. Klett abstained because this was his own unit's retention schedule.

I. Other Business: None

There being no other business, the Committee adjourned at 10:21 a.m.

Michael J. Tyger
Secretary
State Records Committee

Special Request and Authorization for Records Disposal

TO: State Records Committee:

From: James C. Jenkins, Records Analyst 3

Date: January 16, 2018

Subject: Site Inspection at Cranford Police Department, 8 Springfield Avenue, Cranford, New Jersey 07016

A special request and authorization for records disposal of damaged records was presented to the State Records Committee (SRC) on Thursday, December 21, 2017. A discussion ensued between the SRC members and Cranford Police Department representative, Detective Sergeant Russell Luedecker regarding authorization to destroy permanent records due to Hurricane Irene flooding on August 21, 2011. It was recommended to schedule an inspection to investigate the condition of the records and report their findings to the State Records Committee prior to a decision to authorize the destruction request.

A site inspection was conducted on Tuesday, January 16, 2018 at the Cranford Police Department, 8 Springfield Avenue, Cranford, NJ 07016. Attendees at the site inspection were Elizabeth Hartmann, James Jenkins (RMS) and Donald Cornelius, New Jersey State Archives.

The damaged records were removed from Cranford Police Department on September 13, 2011 by American Freeze Dry Operations, Inc. for cleaning and returned March 2014. Currently, the damaged records are secured and separated in the Department's archives storage room, located on the ground floor. The room was rebuilt, cleaned, and had heat, air and dehumidifiers installed to regulate the atmosphere, flood doors were installed, drainage around the building has been installed to avoid any future flooding, the room is monitored by assigned staff on a consistent basis, and lastly, all boxes are neatly stacked on higher shelves.

On December 21, 2017, the Cranford Police Department made a special request of the State Records Committee for authorization to destroy certain records prematurely.

The records in question include:

- Criminal Arrests; 1994-2008; 75 year retention; 6 cubic feet
- Homicide Case Files; 1994-2008; Permanent retention; .1 cubic feet
- Sudden and Accidental Deaths; 1994-2008; Permanent retention; .2 cubic feet
- Latents/Photographs; 1994-2008; Permanent retention; .1 cubic feet
- Fatal Motor Vehicle Crashes; 1994-2008; Permanent retention; .1 cubic feet
- Final Restraining Orders; 1994-2008; Permanent retention; .2 cubic feet
- Vehicle Log Book; 1994-2008; 10 year retention; .1 cubic feet

These records were damaged by a flooding event that occurred during Hurricane Irene, on August 21, 2011. The records in question were completely flooded with water and contaminated with heating oil and sewer effluent. The records were sent to American Freeze Dry corporation for their freeze drying, cleaning, and fumigation services. The Cranford Police Department believes that the resulting records are unusable due to remaining contamination, illegibility, and loss of index integrity.

In order to ascertain the condition of the records, the State Records Committee directed an observational visit to occur prior to further consideration of the special request. On 1/16/2018, Elizabeth Hartmann and James Jenkins from the Division of Revenue and Enterprise Services – Records Management, along with Don Cornelius from the NJ State Archives, visited the Cranford Police Department. The following summarizes the observations of Don Cornelius, Archivist, New Jersey State Archives.

Observation 1: A sampling of the records does not seem to indicate that the majority of them are unusable. A random sampling was observed from several boxes of records, including the records deemed to be the most damaged by the Cranford Police Department officials.

The records do show damage. There is marking and considerable staining from past mold growth and dirt. There is a degree of ink loss and bleed through on many of the records. Some of the records are fused to a minor degree. Many

folder labels have run out or washed off. The worst of the damage was suffered by the latent images and photographs, which are almost a complete loss. There is a musty odor about the records. There is inactive mold (powdery residue) observable in a few locations. However, the records are not so damaged as to be unusable. Even in the worst of the damaged boxes, at least 80% of the records in a file are legible and usable, and often higher. Even though the folder labels have faded or washed, the records within the folders exhibit enough content to reconstruct them. Most importantly, although there is a faint odor, the records are completely dry and not fused, for the most part. They most likely could be used, with basic precautions, as long as they remain dry and stored in proper conditions.

Observation 2: The worst damage from the storm was not physical. Unfortunately, when the records were returned to the Cranford Police Department from American Freeze Dry, their internal organization had been compromised. When records become wet and are then freeze dried, their volume typically increases by 30%-50%. In this case, Cranford sent off approximately 40 c.f. of records to American Freeze Dry, and 60 c.f. were returned. Somehow, these records are now disorganized. They are no longer in case order and the box labels no longer describe the box contents. The result is now an unorganized group of records for which the index no longer applies. How this came to be, and why are not germane to this request; but it was observable and verifiable that the files are no longer organized.

Observation 3: The record amounts specified in the request from the Cranford P.D. are educated guesses. There is no way for them to exactly quantify the volume of specific series due to the expansion of records from getting wet and from the disorganization of the resulting files after return from treatment. The Cranford Police Department tracks the majority of their files according to an electronically designated case number, and then chronologically. The system does not differentiate between types of cases; each case is issued a case file number based upon a numerical and chronological sequence. The result is the co-filing of all different types of files. One box of records may contain cases ranging from misdemeanor vagrancy to murder. This is true across the entire system. Therefore, to remove only the records of permanent or long term retention from the rest of the files is problematic. Even though the Department's electronic file

index can specify a case number, it is now extremely difficult to find that case in a container, especially if the case had more than one file associated with it.

Observation 4: Fortunately, after inquiry, it has been determined that these records can be replaced and duplicated from other sources, including the Cranford Municipal Court and the Union County Prosecutor's Office. The Office of the Prosecutor has stated that they can supply duplicate case files for the criminal arrests, homicides, accidental deaths, images, and fatal MVC files. These files are supplied to the Prosecutor to aid them in making decisions to charge or to prosecute their trials. The electronic case file number assigned by the police department can aid the prosecutor in finding the report within their own files. The final restraining orders are actually the order copy of a record that originates from the Family Court of Union County, and those records can be duplicated by the Family Court. Finally, the vehicle log books are of a much shorter retention, and all but the 2008 log books are already eligible for disposition.

Recommendation: Under ordinary circumstances, I do not believe that the amount of damage to the records in question is severe enough to warrant their premature destruction. However, the damage to the records, combined with the damage done to the internal order of the files as a whole, makes the sorting and sequestering of the records in question problematic at best. Prolonged usage of the retained records would probably require a further fumigation to ensure complete eradication of mold activity to the satisfaction of the Police Department and its employees. In addition, it has been demonstrated that these files can, in fact, be duplicated at need. Taking all of these factors into consideration, the further retention of these records is probably not worth the administrative or financial effort necessary. I recommend approval of the special request for disposal.

Further recommendation: Going forward, it would be a good idea for the Cranford Police Department, and all police departments, to segregate their records into specific types of case files along the lines of the records retention schedule. Despite the usual practice of filing by case number generated by an electronic system, it would not take much effort to file certain record series such as homicides, fatal accidents, etc. in their own separate containers. Due to the permanent nature of these case files, these files should be placed in separate locations (on a higher shelf to protect from flood, for example). This action would

not only protect those case files deemed to be of a permanent nature, but will promote greater adherence to the records retention schedule and good records management practice as a whole. It will be easier to apply the rest of the retention schedule – including periodic disposal of routine files – if case files of a longer retention are not co-filed within.
